

## GINGIVA

Non-normal: Condition-- generalized or localized, describe any lesions. (Gingival evaluation will be discussed in detail in a later session).

## TEETH

Generalized condition-- Rampant caries, generalized mobility, stains, hard and soft deposits.

Calculus description, as well as classification of occlusion and overbite, crossbite, overjet, midline asymmetry, will be discussed in detail in a later session)

## Dental Hygiene Periodontal Diagnosis

Generalized: occurs evenly throughout  
more than 30% of sites involved

Localized: isolated area, less than 30% sites involved

Mild

Moderate

Severe

Plaque induced: systemic factors, medication, mal-nutrition

Non-plaque induced: viral, fungal, genetic, bacterial trauma, foreign body, allergy

Gingivitis

Periodontitis

Ex: Generalized mild plaque-induced gingivitis

72

Localized moderate plaque induced periodontitis  
# 30 B.
